### 3.26.3 Release

## Acronis Service Manager - Support for Trials

In this release we completed the support for Acronis trials. We automated the management of Acronis trials by allowing your customers and your resellers to get a trial for the Acronis Service.

For more details, please check [Acronis Trials](#).

### 3.26.1 Release

## Azure Budget Alerts are now available for Storefront v3

In this release the budget alerts are available also for Storefront v3. The budget alerts can be used by your resellers and direct customers to plan service cost.

With budgets they can:

- View if the current consumption of their Azure subscription is reaching close to the cost budget.
- Define usage thresholds and compare their estimated usages with current usages
- Receive alerts. Alerts are notifications that are sent when a crossover of the current budget takes place

The screenshot shows a 'Budget Alert' form. The title is 'Set Budget Alert for your Subscription: Tech Consulting - Microsoft Azure (EU)'. The form has several fields: 'Budget Name' (text input), 'Budget Type' (dropdown menu with 'Recurring' selected), 'Based On' (dropdown menu with 'Cost' selected), and 'Budget Threshold' (text input with '1,000 €'). Below these fields, there is a section for 'Alerts' with a table. The table has columns for 'Type', 'Recipients', '% of Budget', and 'Amount'. There are two rows of alerts defined: one for 70% of budget with an amount of 700 €, and another for 90% of budget with an amount of 900 €. At the bottom of the form, there are 'Cancel' and 'Save' buttons, and a link to 'Add another alert'.

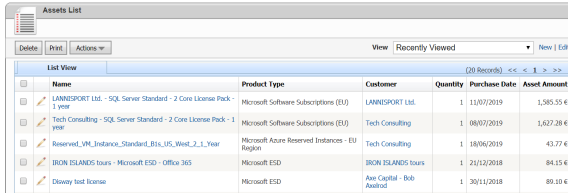

For more details, please check [Setting Azure Budget Alerts](#).

## 3.26.0 Release

# Microsoft Software Subscriptions - Availability of Ordering Process via BSS

In this release we completed the ordering process for the Microsoft Subscriptions from the BSS.

1. Your account managers can now order Microsoft subscriptions on behalf of their customers from BSS.
2. They can see the details of the Software subscriptions they orders from the Assets module.
