

Register a New Integration Connector

A new integration connector with a third party system can be defined in setup area:

1. Go **BSS > Setup > Administration > System Options** and select **Systems Setup**

Provisioning Platforms & Cloud Apps

Applications Setup
In this section you can select which Provisioning Platforms and Cloud Apps will be activated

Integration Systems

Systems Setup
In this section you can select & setup integration systems

2. In order to create a new Integration System, you must select "Activate" from the "Build your own connector" entry.

Integration System		
build your own connector	Build your own connector	Activate
ConnectWise	ConnectWise	Activate
Microsoft Dynamics NAV	MS Dynamics NAV	Activate
NETSUITE	NetSuite	Activate
QuickBooks	Quickbooks	Activate
zendesk	Zendesk	Activate

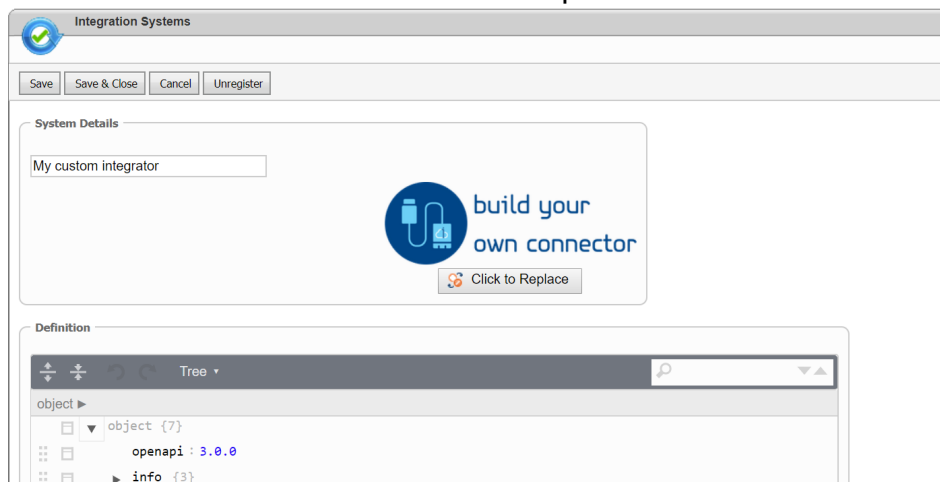

3. Enter **the name of the system** and press **OK**.

User input

Please enter a unique name for the new connector :

OK Cancel

- The user will be redirected to "edit integration" page where by pressing Save the creation of the new custom instance will be completed

An integration connector can be deleted only if it hasn't any instances. The deletion is performed by pressing the **Unregister** button

You can proceed by learning how to describe the third party system RESTful API
